... This May Be The Most  
Important Message You  
Have Ever Received.**

If you are looking for residual income, no doubt you have imagined what life would be like once you are free from the daily scramble to earn enough to pay the bills. Most people would love to sleep in whenever they feel the need, spend plenty of time with their loved ones, explore the world, and pursue their dreams with all the time and money they need.

Unfortunately, the world is full of scamsters and opportunists, ready to exploit those natural desires for their own profit – at your expense. Even many well-intentioned people are unknowingly promoting strategies and business opportunities which are higher-risk than they realise, or have failure built in through an unsustainable structure.

This is your chance to discover the secret criteria used by successful multi-millionaires to evaluate potential passive income streams.

- Three “deal breakers” that will rule out a strategy immediately
- Two “land mines” that lie in wait while you think you are doing well, only to “blow up” months or years later and render all your time and money wasted
- Two things a multi-level marketer will never tell you about their “opportunity of a lifetime”
- The essential characteristics which combine to create a viable “Plan B” passive income strategy suitable for the average Australian resident.
